

Hamad Ali Khan

— **Email:** alikhanhamad49@gmail.com

LinkedIn: hamad-ali-khan — **GitHub:** hamadalikhan4

Education

Pak-Austria Fachhochschule Institute of Applied Sciences and Technology
Bachelor of Science in Cyber Security

Haripur, Pakistan
Expected March 2027

Experience

Cyber Security Intern

Vertiqo

- Conducted network analysis and identified potential security threats.
- Assisted in vulnerability assessments and cybersecurity operations.
- Worked on defensive security monitoring practices.

Web Development Intern

Triangles Pvt. Ltd.

- Assisted in frontend and backend web development tasks.
- Worked with debugging and software development workflows.
- Collaborated with development teams on software implementation.

Cybersecurity Workshop Contributor

Ignite National Technology Fund

- Assisted in organizing cybersecurity and technology workshops.
- Supported student participation in cybersecurity learning activities.

Leadership & Volunteering

Deputy General Secretary

Infosec Alliance

- Organized cybersecurity workshops and awareness sessions.
- Coordinated technical activities and student participation.
- Supported peer learning and cybersecurity community engagement.

Certifications

- **CompTIA PenTest+**
- **Google Cybersecurity Specialization**
- **Automate Cybersecurity Tasks with Python**
- **Office of the CISO Institute: Cybersecurity Essentials**
- **API Security Fundamentals** — APIsec University
- **Jr Penetration Tester** — TryHackMe

Cybersecurity Technical Skills

Offensive Security Tools: Metasploit, Burp Suite, Nmap, Nessus, SQLMap, OWASP ZAP, Gobuster, Dirsearch, Hydra, Nikto, John the Ripper

SIEM & Monitoring: Splunk, ELK Stack, Microsoft Sentinel, Kibana, Threat Monitoring, Log Analysis

Reverse Engineering & Forensics: Ghidra, IDA Free, Autopsy, FTK Imager, Wireshark, Volatility, Binwalk, ExifTool, Sleuth Kit, Process Monitor, Process Explorer

Operating Systems & Platforms: Kali Linux, Windows Server, Linux Environments, AWS, Azure, Docker, VMware, VirtualBox

Programming & Scripting: Python, C, C++, Bash, SQL, JavaScript, HTML/CSS, Flask

Security Frameworks & Standards: MITRE ATT&CK, OWASP Top 10, NIST CSF, ISO 27001

AI & Machine Learning: Artificial Intelligence Fundamentals, AI-Based Security Concepts, WEKA Classifiers, Security Dataset Analysis

Cyber Security Domains: Security Operations (SOC), Network Security, Penetration Testing, Bug Bounty Hunting, VAPT, OSINT, Digital Forensics, Threat Monitoring & Log Analysis, Reverse Engineering, Cryptography, Web Security, API Security, Cyber Threat Analysis, IoT Security, Secure Software Development, Malware Analysis, Incident Response

Projects

Local Honeypot with Live Attack Monitoring Dashboard

Designed and deployed a Cowrie-based SSH/Telnet honeypot integrated with the ELK Stack to monitor attacks and visualize intrusion attempts using Kibana dashboards.

Secure Chatbot with Role-Based Access Control

Developed a secure chatbot system implementing RBAC to enforce authorization policies and protect sensitive interactions.

SSD TRIM Analysis Tool

Developed a forensic analysis tool for investigating SSD TRIM operations and analyzing deleted data behavior in SSD environments.

Digital Forensics Investigation Labs

Performed forensic disk and memory analysis using Autopsy and FTK Imager, investigated packet captures using Wireshark, and conducted malware analysis using Ghidra and IDA Free.

Gesture-Controlled Robot

Built a gesture-controlled robotic system using sensor-based input and microcontroller processing.

Achievements

- Participated in cybersecurity hackathons and technical workshops.
- Organized cybersecurity awareness and peer-learning sessions.
- Merit-based academic recognition and Dean's List achievements.
